# SPEEDBAR ATTACK

*For the Speedbar  
made by:*

- **Icaro**
- **Wills**
- **Moyes**
- **Aeros**

Aerodynamic  
Light  
Strong

Materials: carbon fiber painted transparent.  
Pin and threaded rod: stainless steel  
Easy to install, self-locking nut stops the pod to the  
desired position. The attack is designed to protect  
the instrument in case of a crash.  
The replacement of the threaded rod is fast and easy.
